Tony Attended the emergency Response work shop put on by Virginia (Jenny) Demaris And reported that it was very worthwhile and informative and suggested that if you get a chance to attend future meetings it a great rescores.

Projects: Taft Project discussed,

Georgia Pacific Effluent line discussed: the concern was that plantings placed over the effluent line could become a detriment to the effluent line in the future , the plants were planted by ODOT as a requirement of the DSL permit during the bridge repair project, ODOT is responsible to monitor these plant for a period of 5 years to assure that they become established. I (Ken Lamb) suggested that GP contact the DSL and see if they can take out another permit to establish the plantings in another location to allow the removal of the location over their facilities.

I have not heard back as rather or not the DSL would allow this.

Meeting adjourned.
